# Recessed Water Bottle Filling Station

Product Code: BFSN

Bottle fillers are a great way to keep your students hydrated and cut down on overpriced, environmentally damaging bottled water - the trouble is, they can take up a lot of space in the corridor. If your school is short on space, take heart: our recessed bottle fillers can be fitted within a cavity, out of the way of busy pupils.

Constructed from long-lasting, satin-polished stainless steel, the modern stylings of this recessed bottle filling station make it perfect for sixth forms, secondary schools and colleges. The unit also comes with an easy-press button control, bottle filling spout, and 32mm waste fitting.

Delivery

In stock 2 - 3 working days.
