

Drinking Fountain With Bottle Filler

Product Code: DFBF

If you can't decide between a bottle filling station and a drinking water fountain, then you can have your cake and eat it with a combined bottle filler drinking fountain. These stylish, cost-effective units combine the best of both worlds while saving space in your school. The rounded radius front corners and attractive satin finish make them ideal for use in secondary schools, sixth forms and colleges.

Convertible to a free standing pedestal fountain by adding a cover to the access hole.

Constructed from hardwearing stainless steel, these bottle filler water fountains come with a WRAS approved bubbler tap for drinking, and a recessed WRAS approved bottle filling faucet to prevent the vandalism and accidental damage that can occur with swan neck designs. Each unit is fitted with two separate waste pipes which connect to a single waste outlet.

Delivery

Typically 3 to 5 working days

Next working day delivery available for orders placed before 11.30am (at extra cost to standard delivery)

Tech specs

Material: satin finish stainless steel

Width: 300mm

Depth (front to back): 300mm

Height (top to bottom): 900mm

Waste fittings: 32mm

Bottled water: the high price of convenience

Bottled water may be convenient, but even the cheapest brands are hugely overpriced compared to water from a water fountain or bottle filling station. Nor is bottled water of a higher quality - in fact, most of it is just purified tap water, meaning that most of the money you pay for it goes on the packaging.

The plastic bottles themselves are also harmful to the environment and are a constant source of litter in school playgrounds.

Related products

Our combined bottle filler and drinking fountains are also available in junior dimensions, perfect for infant schools, nurseries and creches.
